

Carson Medical Group

The best way to prevent infection is to avoid being exposed to COVID-19

Wash your hands often with soap and water for at least 20 seconds. If soap and water are not readily available, use an alcohol-based hand sanitizer

Cover your cough or sneeze with a tissue

Put tissues in the trash and wash your hands

Clean and disinfect frequently touched objects

Avoid touching your eyes, nose and mouth with unwashed hands

Avoid close contact with people who are sick

Stay home if you are sick

If you need medical attention call your physician and they will instruct you how to proceed-

Out of an abundance of caution and at the direction of the Public Health Department, to limit the risk of exposure for all our patients, we are asking:

Patients who have symptoms such as fever, cough, difficulty breathing or a severe respiratory illness to please call before entering one of our facilities.
